

### **Information about the distribution of start numbers for the inferno downhill:**

- *Whenever possible, start numbers are allocated in accordance with the previous three years downhill results (overall results).*
- *A ranking in the first 100 entitles a participant to a start number between 1 and 100, or for example a 346th rank to a number between 300 and 400.*
- *The 30 best ladies of the last three years start in a block between 200 and 300.*
- *If there are not enough available numbers per block, some numbers will be moved on to the next block.*
- *The numbers between 650 and 750 are reserved for entrants in the Super-Three, if they have not already been allocated an earlier number.*
- *The last 100 numbers from the start list are the first competitors on the course, they are known as „Sternchenfahrer“. This group contains members of the Mürren and Lauterbrunnen ski clubs as well as others who spend their time helping the organisers of the race after racing.*
- *Participants who have failed to gain at least a bronze in the last three years or are starting for the first time have their entries drawn from a hat. They receive numbers towards the end of the starting list if their team is picked from the lucky dip.*
